Film Scanning Services

Film & Photo Scans

High quality scans made from 35mm & 120 film and prints up to 8x10, suitable for archiving, web, slide shows, small prints, postcards and other uses where image size will not be an issue. Scans can be purchased in 3 different levels of quality and resolution.

Silver quality scans provide a raw file that will require editing and optimization. These are perfect for those who want to save some money and edit their images themselves.

Gold quality scans provide a color corrected, dust spotted image. These are perfect for web, slide shows and archiving of your images.

Platinum quality scans are for those who want the image optimized for printing. The images are color balanced, contrast corrected, dust spotted and minor scratches are removed.
